

CANTEMO
BACK-END DEVELOPERS
OPEN POSITION

At Cantemo, we are a small team of creative developers who are passionate about building great solutions and solving complex problems for our amazing clients. Whether this is at our desks using the latest technologies and operations methodologies or hashing them out whilst taking a coffee break, or over a game of FIFA or Assassin's Creed; we feel that creating a relaxed and fun environment results in creating an environment which produces exceptional work and great experiences.

If you aren't excited about technology, this job probably isn't for you, but if you enjoy:

- ⋮ The challenge of solving complex problems,
- ⋮ The satisfaction that comes from developing a truly stable backend and seeing that make the front end simply work,
- ⋮ Being part of cutting edge video solutions for some of the top organizations in their respective industries.

In short, if you share our passion, and want to combine it with having fun, then read on!

WHAT YOU WILL BE DOING

We are looking for a number of backend developers to join our small, flexible, but highly focused team. The nature of the team means your day-to-day activities will also be varied. They would however mainly consist of:

- ⋮ Contribute to designing and implementing advanced video applications and workflows.
- ⋮ Working closely with our development team to design and further-develop the Cantemo REST API and back-end infrastructure.
- ⋮ Communicate closely and frequently with the front-end team and global partners developing Apps using the Cantemo API's ensuring a synergy with the backend development.
- ⋮ Supporting global partners and customers in their development and usage of Cantemo Portal.

THE BORING BIT

We are looking for someone who is both autonomous and passionate about solving complex problems. We need you to demonstrate some pretty amazing skills when it comes to both object oriented programming and REST API programming. We also need someone with a deep understanding of software architecture and data modeling, as well as of SQL/NoSQL databases, such as PostgreSQL or Cassandra.

Fluency in English is a must as we work with a truly international client base.

If you want to really impress us, then make sure you let us know about any experience with HTML5, video transcoding, Python / Django experience, or knowledge of creative tools, such as video editors and compositing software.

NOW IT GETS INTERESTING

We have around 100 customers worldwide that use our product. Some of them you may not have heard of, but there are quite a few we know you will have done, such as NASA, Disney, Nike, Aol, Unicef, and many more. As they are continuously fed with new software releases, the chances are you will get to work with some big names.

Our customers are in every continent of the world, even Antarctica! This means that it is truly a multi-lingual and multi-cultural environment. It also means that as well as working with an ambitious, but easy-going international team, you may also get to travel to some far-flung places and meet some interesting people in the process.

OUR ETHOS

At Cantemo, we place a great deal of importance on our team. The work environment is collaborative and transparent (no really – we mean it!). We have a flat hierarchy and we allow people that work with us to focus on doing the things they enjoy and do best.

Essentially, our vision is based on the idea that autonomy, in combination with freedom and responsibility, breed innovation. We believe that when talented people work in a flexible and positively challenging environment in the midst of having fun, that's when the magic happens.
